

Section 2

S3 Glacier

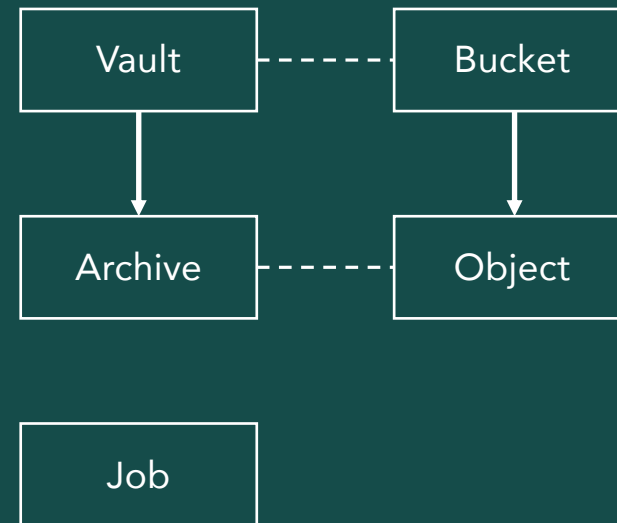

www.3aayaam.in

Agenda

- S3 Glacier terminologies.
- Vault operations.
- Archive operations.

S3 Glacier

- Data archiving.
- Long term backup.
- Compliance, governance, DR.
- Terminologies – Vault, Archive, Job.
- Glacier Vault is similar to S3 Bucket.
- Glacier Archive is similar to S3 Objects.
- Jobs retrieve archive and list archives.
 - archive-retrieval – To retrieve an archive.
 - inventory-retrieval – List archives in a vault.

Vault Operations

- Create vault.
- List all vaults for an account.
- Retrieve vault metadata.

```
aws glacier create-vault --vault-name <name> --account-id <acct-id>
```

```
aws glacier list-vaults --account-id <acct-id>
```

```
aws glacier describe-vault --vault-name <name> --account-id <acct-id>
```

Vault Lock

- Retrieve vault archive list.
- Similar to Object Lock. Used as WORM

```
aws glacier initiate-job --vault-name <name> --account-id <acct-id> --  
job-parameters='{"Type": "inventory-retrieval"}'
```

Archive Operations

- Upload archive. CLI, SDK and API.

```
aws glacier upload-archive --vault-name <name> --account-id <acct-id> --body <file>
```

- Multipart upload of archives. CLI, SDK and API.

```
1. Split file  
2. aws glacier initiate-multipart-upload  
3. aws glacier upload-multipart-part ...  
4. aws glacier complete-multipart-upload
```

Archive Operations

- Retrieve an archive. CLI, SDK and API.

```
aws glacier initiate-job --vault-name <name> --account-id <acct-id> --job-parameters='{ "Type": "archive-retrieval", "ArchiveId": "<archive-id>" }'
```

- Check job status.

```
aws glacier describe-job --vault-name <name> --account-id <acct-id> --job-id <job-id>
```

Thank you
